PROFESSIONAL CERTIFICATE IN

MEDICAL EDUCATION

“When I first signed up for this course, I was not sure what to expect, I was just looking for a way to be able to better connect with my resident physicians. I always knew I wanted to be an academic clinician, but frankly was unaware of what that exactly meant. This course series helped me learn some life-long skills on how to become a better academic clinician, from creating learning outcomes to providing appropriate feedback. Each course was tailored to fit my needs and deficiencies as an academic physician. After completing the course series, I feel more confident when it comes to teaching my residents whether in lecture or by the bedside. Although, the course was rigorous at times especially when I was on service and on call, it was still manageable.”

— Sara Forouhar

PREPARE YOUR INSIGHT FOR TEACHING INCOMING PROFESSIONALS

Are you ready to make an everlasting impression by teaching other healthcare professionals? The Professional Certificate in Medical Education will provide you with the tools you need to turn your first-hand experiences into effective teaching.

Before stepping in front of your learners in the classroom, office, or clinic, introduce yourself to the science of teaching and learning, and develop skills to engage your adult learners. Learn evidence-based approaches to teaching and assessment. Create an interactive, engaging learning environment, and apply all that you have learned by developing a project you can use in your own teaching.

By establishing a framework for teaching, you and your learners can become fully immersed in the learning experience you've designed.

WHAT YOU'LL LEARN

- Evidence-based teaching strategies founded on learning theory and the science of teaching and learning
- Best practices for creating a learner-focused environment in a variety of health care settings
- Methods for assessing student performance and success
- A step-by-step approach to creating or revising curriculum
- Application of your studies through a project designed to reinforce your learning and prepare you for building your own curricula

WHO CAN BENEFIT

This program is designed for all healthcare professionals who wish to develop skills in teaching using their own knowledge and experience.

ADMISSION

Take individual courses or fulfill all of the requirements to earn your UCR Extension professional certificate. Whichever you choose, you will gain the personal power that comes through learning new skills. Be assured that you are receiving education that is backed by the UC tradition of excellence.
